

## 1.2 Calculate Discount

- During a special sale at a store, a 10% discount is taken on purchases over Rs. 1000/-. Write a program that asks for the amount of purchases, then calculate the discounted price.

- Now double click on boundary the push **jButton2 (Calculate Button)**. The code editor window will get open. In it, simply type of following code.

```
1.      Double amt = Double.parseDouble(txtamt.getText());
2.      Double disc, price, discount;
3.      if(amt > 1000)
4.      {
5.          disc = 10.0;
6.      }
7.      else
8.      {
9.          disc = 0.0;
```

```
10.     }
11.     lbldisc.setText(""+ disc + "%");
12.     discount = amt * disc/100;
13.     price = amt - discount;
14.     txtprice.setText(price + "");
```
