

4.2 Lowest Number Finder

- Design a GUI application that obtain three number from the user (in three text fields) and find lowest of the three given number.

- Now double click on boundary the push **jButton1** (Find Lowest Button). The code editor window will appears. In it, simply type the following code.

```
1.      int x = Integer.parseInt(txtnum1.getText());
2.      int y = Integer.parseInt(txtnum2.getText());
3.      int z = Integer.parseInt(txtnum3.getText());
4.      if(x < y && x < z)
5.      {
6.          txtlargo.setText("" + x + "");
7.      }
8.      else
9.          if(y < x && y < z)
```

```
10.    {
11.        txtlargeno.setText(""+y);
12.    }
13.    else
14.        if( z < x && z < y)
15.        {
16.            txtlargeno.setText(""+z);
17.        }
18.    else
19.    {
20.        txtlargeno.setText("No same.!");
21.    }
```
